HTML/CSS basics

LANGUAGES

Hebrew, English

EXPERIENCE

Product Designer

Blockchain Platform (Stealth)

2025 - Present

- Leading product design for a consumer blockchain platform in stealth mode, defining core ownership, authentication and transaction flows for the MVP.
- Developing a digital authentication system to verify authenticity and manage digital certificates for high-value physical assets.
- Building organized Figma component libraries and design assets to ensure a consistent look and feel and support rapid MVP development.

Senior UX/UI Designer

Malam Team

2019 - 2025

- Served as the primary product designer across multiple cross-functional teams, partnering with product managers and engineers to define product features and strategy.
- Owned the full-cycle UX/UI design for large-scale B2B and B2C platforms, including cybersecurity, logistics, fintech, and secure national citizen-facing systems.
- Led the design of a digital transformation platform recognized for innovation and usability, which received the IT Award 2024 for Excellence in Government Tech.
- Built and scaled enterprise design systems in Figma, creating component libraries and standards adopted across multiple product teams.
- Worked in agile sprints, frequently adjusting to evolving requirements and short timelines while maintaining high standards for quality and delivery.

UX/UI Designer

Pionet Technologies

2017 - 2019

- Delivered UX/UI for municipal and healthcare platforms, balancing user needs with technical constraints.
- Led UX for critical government initiatives and conducted user research and usability testing to validate design decisions.
